	Examiner Alvin J Stewart	Art Unit 3738	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Applicant's election of Group II, Species II and Sub-species I in the reply filed on August 12, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-11, 13, 15, 20 and 22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group and/or species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 12, 2004.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 12, 14, 16-19 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Jang US Patent 6,770,088 B1.

Jang discloses a catheter/prosthesis assembly (see Fig. 11) comprising a delivery balloon (146), an expandable body (10, see Fig. 8E) having a first end (12), a second end (14), a plurality of interconnected cylindrical wall sections (24) and a plurality of S-shaped connectors (26).

Regarding claims 12 and 21, the s-shaped connectors are capable of providing expansion and contraction. For example, during expansion the s-shaped connectors provide expansion.

Art Unit: 3738

However, if the stent is in a curved configuration (a C-shaped blood vessel) the S-shaped connectors are capable of providing a contraction.

Regarding claim 18, see Fig. 8F showing an offset configuration of the S-shaped connectors.
